ABSTRACT

This file provides a template for writing papers for the conference. The conference proceedings will be published in an electronic format. The manuscript in MS Word or L^AT_EX format shall be written in compliance with these instructions.

1 INTRODUCTION

It is expected that the authors will submit carefully written and proofread material. Spelling and grammatical errors, as well as language usage problems, are not acceptable. The authors should limit their papers to 8 pages, presenting their results as concisely as possible. The papers must be written in the English language.

2 PAPER FORMAT

The uniform outlook will help the reader to follow the proceedings. This can be obtained most easily if the authors use this template file to construct their manuscripts. Please note the following details: this template is an A4 format with 25 mm margins on the left, right, top and bottom.

All text paragraphs should be single spaced; with the first line indented for 10 mm. The position and style of headings and subheadings should follow this example. No spaces should be placed between paragraphs or headings and paragraphs.

2.1 Header, Footer, Page Numbering

If this template is used when writing the manuscript, the headers and footers will be set automatically. The authors are only asked to replace the “NNN” with their paper ID on the footer of the first page in order to set a unique page number. The paper ID is written on your letter of acceptance or can be obtained from the web site of the conference (www.djs.si/nene2026) in the ConfTool database.

2.2 Fonts

The papers should use 12-point Times New Roman or equivalent. Times, Symbol or Arial fonts can be used in figures. It is recommended that the text in figures is not smaller than 10-point font size. The authors are discouraged from using other fonts.

2.3 Figures and Tables

The figure captions and table headings should be sufficient to explain the figure or table without needing to refer to the text. Figures and tables not cited in the text should not be presented.

Table 1: Example table

Important dates	
August 20 th , 2026	Full length papers for Young Authors Competitors
August 31 st , 2026	Full length papers
November 15 th , 2026	Camera ready papers

The tables and figures should be placed close after the paragraph of their first mentioning. All figures and tables shall be numbered with Arabic numerals. The table headings shall be centred above the tables. The figure captions should be centred below the figures.

Figure 1: Example figure — The seaside terrace at the Hotel Histria

Please use “[htb]” parameters for figures positioning.

2.4 Equations

Each equation should be presented on a separate line with a blank space above and below. The equations should be numbered consecutively at the outer right margin, as shown in Eq. (1) below.

$$\rho \left(\frac{\partial \mathbf{u}}{\partial t} + (\mathbf{u} \cdot \nabla) \mathbf{u} \right) = -\nabla p + \mu \nabla^2 \mathbf{u} + \mathbf{f} \quad (1)$$

2.5 References

Reference numbers in the text should be designated by square brackets, e.g., [1], [4]. The references should be listed in the same order as cited in the text. Some examples of how to list references are given in the Section References.

3 SUBMITTING THE MANUSCRIPT

The \LaTeX manuscripts should be submitted as a PDF file electronically through the conference website (www.djs.si/nene2026) before August 31st, 2026 (or before August 20th, 2026 in case of Young Author Competitors). Please login to your user account and upload the paper in the “Your Submissions” menu.

ACKNOWLEDGMENTS

The organizer gratefully acknowledges the work done by all Organizing Committees of the International Conferences Nuclear Energy in New Europe who prepared the first and the improved versions of the template.
